

Redefining The Patient Journey

By Utilizing the Power of Blockchain, DeFi, AI and Smart Contracts

Project Introduction

Tokenizing healthcare by leveraging the power of Defi and blockchain. Empowering patients by enabling them to access, have ownership of and monetize their clinical records, while also offering a Defi protocol for covering medical-based financial obligations.

MedicalVeda seeks to address the modern-day challenges faced by the health care industry. It leverages innovative technologies such as Blockchain, Defi, Artificial Intelligence and Smart Contracts. Medical Veda decentralizes the access to and ownership of medical records while presenting patients with a scalable, eminently compatible, secure and interoperable platform. In addition, it allows patients and medical practitioners to get seamless lending solution for their medical-related financial needs.

OUR VISION

We strive to create an ecosystem where patients are the true owners of their clinical record and can access this information at anytime, anywhere. We envision to contribute to the world's health and medical industry by creating an ecosystem that would make the patient's health data record process distributed through a decentralized blockchain so that anyone can get access to their medical record without having to go through the bureaucratic hassles.

OUR MISSION

Medical Veda aims to be the world's leading open-source health ecosystem for enabling decentralized ownership of patient data while enabling all industry players to get permissioned access to this data in a seamless, secure and instant manner.

We strive to enable patients to have access to capital required for treatment anytime, anywhere.

Key Products

VEDA HEALTH PORTAL

Enabling users to be owner of their own medical records, this platform provides a health portal accessible for all industry players

MVEDA TOKEN

A dedicated payment gateway that allows its holders to get direct utility to all Products and services within the veda ecosystem.

VEDA DATA MARKETPLACE

Enabling all key stake holders to leverage a collaborative exchange of vital research and healthcare data.

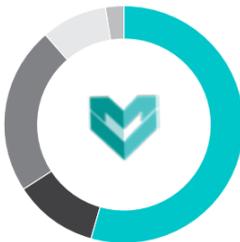

MEDFIN VEDA

A modern-age Defi protocol enabling decentralized p2p lending for the health care industry. Medfin Veda Defi allows patient needing funds for a medical procedure.

Token Sale

Token Supply	88 Million
Token Name	Mveda
For IEO Sale	60%
Hard Cap:	8 Million USD
Accepted Currencies	BTC/ETH/USD
Total Token Supply	88000000
Token Price	0.16 USD

TOKEN ALLOCATION

- Public Sale - IEO **60%**
- Team and founder, adviser & partners **12.5%**
- Reserve fund **25%**
- Marketing fund **10%**
- Bounty end events **2.5%**

FUNDS DISTRIBUTION

- Platform Development **40%**
- Recruitment And Compensation **20%**
- Marketing And Media **30%**
- Legal Cost **10%**

PROBLEMS

P	Restrictive ownership and accessibility
P	Data fragmentation and interoperability issues
P	Trust deficit between patients & medical practitioners
P	Centralization of business model
P	Lack of access to capital required for expensive medical procedures

SOLUTIONS

S	Blockchain based distributed ownership and accessibility
S	Highly interoperable hybrid combination of data storage
S	Trustless deeds & transparent transactions through blockchain & Smart contracts
S	Decentralization through tokenization and distributed ownership
S	By offering Veda Defi Lending ensures liquidity & easy conversion to fiat currencies

WHY CHOOSE MEDICAL VEDA?

Unique and futuristic business model	Team expertise	Incentivized exchange of data
Self-sustainable operations enabled by blockchain	Transparent transactions	Multi revenue in-streams
